

9/14/20

- By Tomorrow:
 - Tie together demo
- Security things to consider:
 - Maintain anonymity
 - Maintain secure connection to server
 - Make sure can't spoof voting rights
- ToDo:
 - Agenda page w/ firebase
 - Web security refresher
 - Wireshark (deep package inspection)
 - Make sure to have https
 - Settings for certificate
 - Find security flaws
 - Add ability for host to create a session

9/15/20

- From Kate:
 - Looks good so far
 - Still agrees with our vision
 - MyHamilton or stand-alone
 - Description of what a yes/no vote means
 - Ability to hide/show results of poll
 - Add a poll on the fly
 - Kate wants to send email to get list
 - Once Linda has a list, she can easily continue to manage in the future
- ToDo:
 - Connor- Meeting Room, Add Poll Button Functionality, Edit Button
 - Louise- Components, Text Editor Box, Styled Input Box, Page Headers
 - Chad- Integrate Stuff Above w/ Firebase, ungeneralize current stuff
 - Jack- Security Stuff, Wireshark (inspecting packages)

9/21/20

- What we have so far is good enough for an alpha
- Just need to tie it all together
- Maybe add a draft of a way to show poll results
